Open SCADA system — OpenSCADA 0.8.0

(documentation)

Release

Release notes — **>** <u>file</u>

Characterizations and demands — **>** <u>file</u>

Main system documents

Main document about OpenSCADA system — file

Terms and abbreviation — file

Frequently answers to queries about OpenSCADA system (FAQ) — file

Programm manual — file

Quick Start — file

Data acquisition in OpenSCADA — file

OpenSCADA system API — file

The manual for building of OpenSCADA from source texts — file

Guide to localize crashes and to report about them — file

User API libraries

- <u>User API of the OpenSCADA core object model</u> <u>| file</u>:
 - <u>User object API of language JavaLikeCalc.JavaScript</u> <u>Sfile</u>
 - <u>User object API of the visual control area engine</u> <u>Sfile</u>
- API functions library of the OpenSCADA object model:
 - The library of functions compatible with SCADA Complex 1 of the firm Ltd SIC "DIYA" [> file
 - The library of standard mathematical functions File
 - The library of system API of user programming area pfile
 - <u>Library of models of technological devices</u> <u>Sfile</u>

Graphic Elements' libraries of the OpenSCADA system

- Main elements library of the user interface > file
- <u>Mnemonic elements library of the user interface</u> <u>Sfile</u>
- Electrical elements library of the user interface File

Documents to OpenSCADA modules

- Subsystem "Archives":
 - The archivator to FS File
 - The archivator to DB \(\sum_{\text{file}} \)
- Subsystem "Data bases (DB)":
 - <u>DB DBF</u> <u>▶ file</u>

• DB MySQL — File
• DB SQLite — file
• <u>DB FireBird</u> — <u>File</u>
• <u>DB PostgreSQL</u> — <u>> file</u>
Subsystem "Data acquisition (DAQ)":
 <u>Diamond data acquisition boards</u> — <a> file
• OS data acquisition — File
• Block calculator — File
• <u>Java-like language calculator</u> — <u> file</u>
• <u>Logical level parameters</u> — <u>File</u>
• Simple Network Management Protocol — > file
• Siemens S7 PLC — File
• ModBus — ▶file
• DCON client — File
• ICP DAS client — > file
• <u>Data sources gate</u> — <u>> file</u>
• Sound card — pfile
• OPC UA — File
• BFN — File
Subsystem "Transports":
• Sockets — File
• Security Socket Layer — > file
• <u>Serial interface</u> — <u>File</u>
Subsystem "Transport protocols":
• HTTP — File
• Self system protocol — File
• <u>User protocol</u> — <u>> file</u>
• ModBus — File
• OPC UA — File
Subsystem "Special":
• SCADA Complex1 (NIP "DIYA") compatibility user level functions — > file
• Standard mathematical functions library — File
_
 Functions library of system API of user level programming — file OpenSCADA system's tests — file Subsystem "User interfaces": QT GUI starter — file System configurator - QT — file System configurator - Web — file Dynamic Web configurator — file
